Introduction & Context

WΔO

Introduction & Context

What is AI Literacy?

- Where did this work come from?
- Definition of AI Literacies (plural, acknowledging different contexts)
- How AI is shaping open education today

Why this matters for Open Educators

- Challenges and opportunities in using AI for open educational practices
- Ethical and technical considerations in adopting AI tools
- Role of AI in digital skills and OER creation

What are people really saying when they say something is a 'literacy'?

Digital literacy is about...

POWER

(just like all other forms of literacy)

~~Digital literacy~~

Digital literacies

It's all about
CONTEXT

Digital literacies are
**SOCIALLY
NEGOTIATED**

Our Research

WΔO

Our Research

Research Questions

- Perspectives of global educators on AI in open ed
- Technological, pedagogical, and content literacies required to use AI for open ed
- Ways that AI literacies give meaning to an opened culture

Methodology Overview

- How the study was conducted (global perspectives, qualitative/quantitative approach)
- Key data sources and research methods

**“ONE RING TO RULE
THEM ALL, ONE RING
TO FIND THEM,
ONE RING TO BRING
THEM ALL AND IN
THE DARKNESS
BIND THEM.”**

— GANDALF, THE FELLOWSHIP OF THE RING

Conceptual Frameworks

Dimensions of AI Literacies

- Cultural
- Cognitive
- Constructive
- Communicative
- Confident
- Creative
- Critical
- Civic

TPACK Framework

- Technical knowledge
- Pedagogical knowledge
- Content knowledge

Three C's of Opened Culture

- Collaboration
- Creation
- Connection

Key Findings

Key Findings

- **Finding 1:** Three AI literacies stood out amongst open practitioners
- **Finding 2:** Ethical and impactful AI usage requires technical, pedagogical, and content knowledge
- **Finding 3:** AI is changing the ways open educators think about collaboration, creation, and connection

Finding 1: Emergent AI Literacies

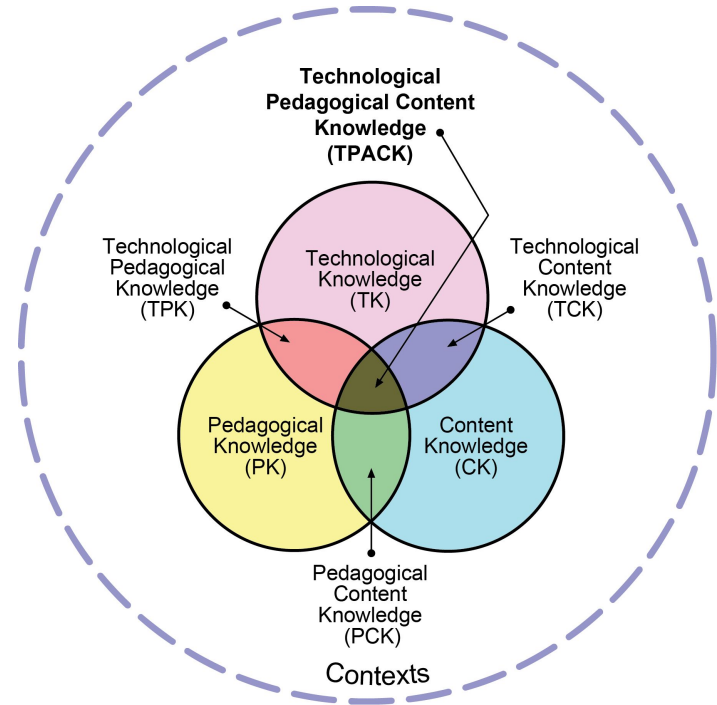

- Cognitive and critical AI literacies cited the most
- Critical dimension was evolving into civic AI literacies for open practitioners
- AI literacies will continue to shift as our use cases become more mature

Finding 2: AI Literacies and the TPACK Framework

Using AI for open education requires the following literacies:

- Technical Knowledge (e.g. Constructive and Creative AI Literacies)
- Pedagogical Knowledge (e.g. Cognitive and Communicative AI Literacies)
- Content Knowledge (e.g. Cultural and Critical AI Literacies)

Finding 3: AI Literacies and Opened Culture

AI is changing the ways in which we think and act within our cultures of openness:

- How we **collaborate**
- What we **create**
- How we **connect** to our audience(s)

Submit a Case Example

Complete the following form to submit an example of an application of any of the dimensions of AI literacies. Your submission, which can be credited to you or anonymized, will help our research team measure the appearance and application of the dimensions of AI literacies geographically, longitudinally, and contextually.

Which primary dimension does your example relate to? *

CULTURAL - Recognizing the connections between people, AI-informed resources and tools, and points of engagement within AI tools and AI-enabled environments

COGNITIVE - Expanding intellectual capabilities by engaging with AI-enabled processes and environments

CONSTRUCTIVE - Utilizing AI tools to build, remix, and generate new content, applying AI capabilities

COMMUNICATIVE - Leveraging AI technologies to convey ideas effectively, recognizing the sociocultural practices and nuances that AI interprets and influences in different settings

CONFIDENT - Developing the ability to solve problems and manage learning within AI-driven environments by understanding and harnessing their unique features and potentials

CREATIVE - Engaging in ideation and generative actions using AI, focusing on how AI can add value and introduce new possibilities within specific contexts

CRITICAL - Examining the power dynamics and ethical

CIVIC - Employing AI knowledge and skills to contribute

Applying AI Literacies IRL

WΔO

Applying AI Literacies IRL

Q1: Do you consider Generative AI a 'threat' to Open Education? Why / why not?

Q2: What sort of practices and perspectives are you exploring around AI at the moment?

Q3: Which dimensions of AI literacies do you think need developing most by open educators?

Dr Genevieve Smith-Nunes

Lecturer @ University of Roehampton/
King's College London | Ethics,
Computing, Digital Creativities, Ethics,
Immersive technologies, AgileDBR

Applying AI Literacies IRL

Q1: Do you consider Generative AI a 'threat' to Open Education? Why / why not?

Q2: What sort of practices and perspectives are you exploring around AI at the moment?

Q3: Which dimensions of AI literacies do you think need developing most by open educators?

Dr Nicola Pallitt

Lecturer at Rhodes University,
based in CHERTL's EdTech unit,
critical EdTech research & practice,
e/merge Africa member

Applying AI Literacies IRL

Practical steps for educators

- How to critically evaluate AI tools
- How to design AI literacies activities for students
- What educators can do to support open AI practices

Building AI Literacies together

- Why collaboration is key
- Example approaches or prompts

What role should Open Educators play?

- Discussing ethical implications in classrooms
- Encouraging learners to be critical AI users

Q&A + Discussion

Some prompts for discussion:

- How do you see AI affecting your practice as an educator?
- What challenges have you faced when using AI in education?
- What AI literacies resources would be most helpful to you?

WAO

Key Findings

- **Finding 1:** AI Literacies are context-dependent
- **Finding 2:** Ethical use and awareness of bias is critical
- **Finding 3:** AI as a co-creator, not a replacement
- **Finding 4:** Need for OER to support AI Literacies
- **Finding 5:** Educators need more support & collaboration

Finding 1: AI Literacies are context-dependent

- Educators need to shape AI literacies based on their subject, learners, and institutions.
- Open educators must actively participate in defining what AI literacy means for their context.

“ Additionally, many frameworks continue to present literacy as a binary state—literacy versus illiteracy—rather than as a plurality of interconnected, socioculturally situated practices. (p.4)

”

Finding 2: Ethical use and awareness of bias are critical

- AI tools can reinforce biases in content and access.
- Educators need strategies to critically assess AI-generated outputs.

“ *The educators overwhelmingly pointed to the need to have mature knowledge of technology, content, and pedagogy. They cited a need for both educators and learners to know how AI tools work and where they pull data from, as well as the mechanics for prompting AI systems. (p.7)* ”

Finding 3: AI as a co-creator, not a replacement

- I should be used to support, not replace, human creativity in OER development.
- Examples of co-creation strategies in open education.

“ Most notably, the educators cited the greatest opportunity for AI in open education as the ability to advance open educational practices as critical competencies, explaining how open pedagogy could help to guide strategy for AI’s usage across all contexts. (p.7) ”

Finding 4: Need for OER to support AI Literacies

- The current lack of AI literacy resources that are openly available.
- Why an open repository is needed.

“Where other conversations with educators on AI in education were basic in their expression of civic AI literacies, the open educational practitioners who took part in this study expressed deep knowledge of the potential of AI and OEP to be used to positively contribute to their local and global communities. (p.8)

”

Finding 5: Educators need more support & collaboration

- AI tools are evolving rapidly, requiring ongoing dialogue and professional development.
- Importance of community-driven approaches to AI literacies.

“ Lastly, the educators affirmed that an understanding of the learning process was necessary in using AI for open education, particularly in the creation of humanized, learner-centered content. (p.7)

”
