You need a...

CONTENT STRATEGY

5 steps to effective content strategy

Content Plan

Align your content with the user needs. Identify the topics you will cover and the questions you will answer with your content.

Content Audit

Have a look at your existing content to decide:

- What can be used as-is
- What should be updated
- What needs to be created from scratch

Production Plan

Decide on the format (e.g. video, podcast, web page) of each piece of content. Identify who will be the author, subject experts, and other people you need to contribute to it.

Performance Measures

Be realistic about how you want each piece of content to 'perform' within the channel you are using to promote it. Decide how you will track and measure this.

Distribution Plan

Use these 4W's to ensure each piece of content gets to users in a timely way:

- Who
- What
- When
- Where
