

we are open

A very brief introduction...

WAO

WΔO

WHAT WE DO

Providing strategic and digital expertise

learn with
WΔO

We facilitate thinking.

We design and run workshops, discovery sessions, thinkathons, strategy sessions, unconferences and courses of all shapes and sizes.

We articulate concepts.

We research and write articles, curricula and reports and speak at conferences, universities and in virtual video. We also do illustration and design, draw system maps, make wireframes, and other kinds of visuals.

We are experts.

We are pros in digital strategy, open source, education, cooperatives, the future of work, storytelling, community development and technology.

We are our members.
